EDUCATION

Bachelor of Science in Computer Science

Sep 2023 – May 2027 | Newark, NJ

New Jersey Institute of Technology

- **GPA:** 3.96 | **Awards:** Highlander Achievement Scholarship Recipient, Dean's List: 2023, 2024
- **Campus Involvement:** Webmaster for Kids Who Code (KWC), Member of ACM and NJIT Archery Club

SKILLS AND CERTIFICATIONS

Programming Languages: Python, Java, C++, SQL, Javascript, Typescript

Machine Learning & Data Science: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, NLP, OpenCV

Web Development: React.js, Tailwind CSS, HTML, CSS, Flask, Streamlit, Vite

Tools & Platforms: Git/GitHub, CI/CD, MongoDB, MySQL, PostgreSQL, LangChain, Azure Studio, AWS, PySpark, Figma

Certifications: Data Science Fundamentals (NASBA), Microsoft Certified: Azure Data Scientist Associate, Cornell Machine Learning Certificate

PROFESSIONAL EXPERIENCE

Undergraduate Research Assistant

Aug 2025 – Present | Newark, NJ

Department of Data Science, NJIT

- Built ETL pipelines in Python (Pandas, NumPy) to preprocess epidemic datasets with reproducible workflows
- Benchmarked forecasting models (LSTM, GNN, VAR) using PyTorch, PyTorch Geometric, and Statsmodels
- Conducted EDA and statistical analysis with Python, evaluating models via RMSE, MAE and other metrics

Artificial Intelligence and Machine Learning Fellow

Jun 2025 – Present

Break Through Tech @ Cornell Tech

- Selected nationally from 3,000+ applicants for 12-month Break Through Tech AI/ML fellowship at Cornell Tech
- Completed ML coursework, applying supervised/unsupervised learning and model evaluation on real world datasets
- Building investor-focused solution with G&M and Chambers Capital Ventures to assess leadership traits for improved prediction of company success

Undergraduate Research Assistant

Apr 2025 – present | Newark, NJ

Department of Computer Science, NJIT

- Co-authored peer-reviewed papers accepted for publication and presentation at international conferences MICAD 2025 and ICECER 2025 on improving SATE deep learning models for privacy-preserving
- Built preprocessing and augmentation pipelines on dermatology datasets, enhancing generalization in models
- Designed and trained CNNs (ResNet-18 and variants) with advanced optimization methods, doubling recall in one of our approaches and enhancing robustness

PROJECTS

LearnAlong – AI-Powered Learning from YouTube | Full Stack Developer 🔗

React, Tailwind CSS, LangChain, Flask (Python), MongoDB (Vector Search), Hugging Face Sentence Transformers

- Developed a full-stack application with a React + Tailwind frontend and Flask REST APIs to handle transcript extraction and vectorization
- Implemented RAG pipeline with Sentence Transformers and MongoDB vector search for transcript retrieval
- Integrated LLaMA-2 into the RAG pipeline to power context-aware chat and automated quiz generation, enhancing interactive learning workflows

Fork It – Group Restaurant Recommendation System | Machine Learning & Backend Engineer 🔗

Python, Scikit-learn, Pandas, BeautifulSoup, Flask, TF-IDF, Cosine Similarity

- Built a Flask backend to process group dining preferences using a hybrid pipeline with TF-IDF for textual queries and one-hot encoding for categorical attributes
- Aggregated individual user vectors via weighted averaging and applied cosine similarity to compute group-level preference alignment
- Ranked Trenton-specific restaurants scraped with BeautifulSoup and delivered personalized results through a Flask REST API for real-time group recommendations
